1. Introduction

The boards of 1Spatial and Avisen are pleased to announce that they have agreed terms of a merger whereby the entire share capital of 1Spatial would be acquired by Avisen in consideration for the issue of 5.761 New Avisen Shares for each 1Spatial Share. The Proposal is to be implemented by means of a Scheme of Arrangement under the Act, which requires the approval of 1Spatial Shareholders and the sanction of the Scheme and confirmation of the Reduction of Capital by the Court. On completion, the Enlarged Group will transition to a single 1Spatial brand.

2. Terms of the Scheme Offer

It is intended that the Scheme Offer will be implemented by means of a Court-sanctioned Scheme of Arrangement pursuant to Part 26 of the Act involving a reduction of capital of 1Spatial under the Act. The Scheme is subject to the satisfaction (or, where applicable, waiver) of the Conditions and sanction of the Court.

The Scheme provides that, if it becomes effective, all of the existing 1Spatial Shares will be cancelled under the Reduction of Capital and a like number of New 1Spatial Shares will be issued, fully paid, to Avisen. The reserve arising from the cancellation of the existing 1Spatial Shares will be used in paying up in full such New 1Spatial Shares. In exchange, under the Proposal, all 1Spatial Shareholders will be entitled to receive:

For each 1Spatial Share: 5.761 fully paid New Avisen Shares

1Spatial will become a wholly owned subsidiary of Avisen on the Effective Date. Avisen is a public company incorporated in England and Wales, and its shares are admitted to trading on AIM.

The Proposal values the entire issued share capital of 1Spatial at approximately £4.74 million and each 1Spatial Share at 22.35 pence (based on the Closing Price of 3.88 pence per Avisen Share on 6 October 2011, the last Business Day prior to this Announcement).

Entitlements to New Avisen Shares will be rounded down to the nearest whole number of Avisen Shares. Fractions of New Avisen Shares will not be allotted or issued to 1Spatial Shareholders. Fractional entitlements of New Avisen Shares will be aggregated and sold in the market and the net cash proceeds of the sale retained for the benefit of Avisen.

1Spatial Shareholders should note that the value of the Consideration that they will ultimately receive (once the Scheme is implemented and becomes effective in accordance with its terms) will depend upon the market value of New Avisen Shares received by them on the settlement date, and this value may vary.

The New Avisen Shares will be issued credited as fully paid, on identical terms to and will rank *pari passu* with the Avisen Shares in issue on the date on which the New Avisen Shares are issued, including the right to receive and retain all dividends, distributions or entitlements declared, paid or made after the Scheme becomes effective.

Application will be made to the London Stock Exchange for the New Avisen Shares to be admitted to trading on AIM following the Scheme becoming effective. Upon the scheme becoming effective, 1Spatial's shares will be cancelled and therefore no longer be admitted to trading on AIM.

If the Scheme becomes effective, 1Spatial will become a wholly owned subsidiary of Avisen on the Effective Date and the 1Spatial Shareholders will receive the Consideration referred to above.

Scheme becoming effective

The Scheme requires the approval of a majority in number of the 1Spatial Shareholders representing at least seventy-five per cent. in nominal value of the 1Spatial Shares present and voting (either in person or by proxy) at the Court Meeting (voting at which shall be conducted by way of a poll). In addition, the Reduction of Capital will require the approval of 1Spatial Shareholders at the General Meeting.

If the Scheme becomes effective, it will be binding on all 1Spatial Shareholders, irrespective of whether or not they attended or voted at the Court Meeting or the General Meeting.

Avisen intends to make an application to the London Stock Exchange for admission to trading on AIM of its New Avisen Shares. Upon the scheme becoming effective, 1Spatial's shares will no longer be admitted to trading on AIM.

Interests in the Enlarged Group

Following the Scheme becoming effective, existing Avisen Shareholders will hold 226,699,878 Avisen Shares representing approximately 65.0 per cent. of the Enlarged Issued Share Capital of Avisen and existing 1Spatial Shareholders will hold approximately 122,069,402 Avisen Shares representing approximately 35.0 per cent. of the Enlarged Issued Share Capital of Avisen.

3. Recommendation

The Independent 1Spatial Directors who have been advised by Libertas, consider the terms of the Proposal to be fair and reasonable and this is why they unanimously intend to recommend that 1Spatial Shareholders vote in favour of the Resolutions to give effect to the Proposal, as the Independent 1Spatial Directors have irrevocably undertaken to do in respect of their beneficial holdings of 12,299,725 1Spatial Shares representing approximately 58.0 per cent. of the existing issued ordinary share capital of 1Spatial. In providing its advice to the 1Spatial Board, Libertas has taken into account the commercial assessments of the Independent 1Spatial Directors.

In order to approve the terms of the Proposal, Scheme Shareholders will need to vote in favour of the Resolution to be proposed at the Court Meeting and 1Spatial Shareholders will need to vote in favour of the Resolutions to be proposed at the General Meeting to be held on 7 November 2011. The unanimous recommendation of the Independent 1Spatial Directors and advice to 1Spatial Shareholders is set out in paragraph 5 of this Announcement.

Marcus Hanke is a non-executive director of 1Spatial and is also an executive director of Avisen. As a result, Marcus Hanke has not participated in the consideration by the 1Spatial Board as to whether the Proposal is fair and reasonable, nor the decision to recommend the Proposal. Marcus Hanke owns or is interested in 32,690 1Spatial Shares representing approximately 0.15 per cent. of the 1Spatial Shares in issue and owns or is interested in 29,026,314 Avisen Shares representing approximately 12.8 per cent. of the Avisen Shares in issue. The Independent 1Spatial Directors do not have any interest in any Avisen Shares.

Statements made or referred to in this Announcement concerning Avisen's reasons for the Proposal and to the intentions and expectations of Avisen and its subsidiaries reflect the views of the Avisen Board. Statements made or referred to in this Announcement concerning the background to and reasons for the Independent 1Spatial Directors recommending the Proposal reflect the views of the 1Spatial Board.

4. Background to and reasons for the Proposal

On 19 October 2010, 1Spatial was admitted to trading on AIM by way of a reverse acquisition of IQ Holdings plc. The reasons for this transaction were three-fold:

- (i) to enable 1Spatial to raise capital by way of investment in shares in the listed company, which supported further investment in technology development and marketing;

- (ii) to enable ISpatial to raise capital by way of investment in shares in the listed company in order to support geographic expansion by way of acquisition; and
- (iii) to strengthen the business acumen of the company by attracting independent advisors and investors.

Since the completion of the listing, ISpatial has achieved a series of key milestones:

- completed an acquisition in Australia to exploit the growing demand for high quality spatial data to support environmental management and economic development
- completed the delivery of the landmark data management solution to Ordnance Survey Great Britain (OSGB)
- secured long term, high value contracts with Ordnance Survey Ireland for data re-engineering and enhancement and with OSGB to support the automation of their product generation capability
- restructured the company to factor in all exceptional costs and maximise future profitability

As a result, ISpatial is now positioned for growth, which will be best achieved through further investment in its rule-engine. ISpatial's rule-based approach to spatial data processing is gaining increasing acceptance in the marketplace. To exploit this, ISpatial has structured the company to focus on three markets:

- (i) its core market: the National topographic mapping and cadastral agencies, who require enterprise solutions for nationwide data management. ISpatial is branding this offering as Imperium, which now requires investment to productise and exploit its market advantage;
- (ii) the GIS market, where ISpatial continues to strengthen strategic relationships with the major players in this sector, who are interested in integrating ISpatial's rules engine and geo-processing components as the public data transparency initiatives lead to the development of new knowledge based applications; and
- (iii) the data quality market which is being addressed with a new Software as a Service offering, marketing under a new brand, Socium.

In addition, ISpatial's Board of Directors believes that the wider analytics Business Intelligence marketplace provides an opportunity to extend the spatial data supply chain into location enabled decision-making.

Avisen operates through two businesses with the common focus of enhancing client profitability. Its business and technology consultancy, Avisen, specialises in Performance Management, with a focus on strategy creation, development and implementation through business advisory services and distribution and implementation of Acorn Systems software solutions. Storage Fusion develops and sells Storage Resource Analysis Software.

Avisen was admitted to trading on AIM on 2 February 2009 following its reverse takeover of Z Group plc. Since its admission, Avisen has pursued an acquisition strategy in the Corporate Performance Management market and to date has completed six acquisitions.

The Avisen management team has demonstrated its ability to rapidly absorb the new businesses in order to achieve cost savings and to grow the recurring income base of the Avisen Group through software and solution support.

Avisen now provides advisory services and software distribution to a growing number of blue chip corporations and examples include: Tesco Direct and Unilever.

The boards of Avisen and ISpatial believe that Avisen's acquisition of ISpatial will allow the Enlarged Group to:

- establish a more experienced management team with a broader skill set through the appointment of Nic Snape, Dr. Mike Sanderson and Steve Berry to the Avisen Board. This will further enhance the Enlarged Group's ability to identify future opportunities to enhance shareholder value;
- accelerate the investment in ISpatial's Imperium, GIS Market Strategic Relationships and Avisen's new brand, Socium;

- utilise the cash resources of Avisen in order to accelerate the growth of the Enlarged Group, both organically and by further acquisitions in the business and technology sectors;
- extend the location supply chain capability, to offer location enabled decision making to the Business Intelligence market; and
- optimise the Storage Fusion Business as part of Avisen's existing performance management services.

Further information on Avisen and the strategy for the Enlarged Group will be set out in the Scheme Document.

5. Background to and reasons for recommending the Proposal

The Independent 1Spatial Directors have considered the terms of the Proposal and unanimously recommend that 1Spatial Shareholders vote in favour of the Resolutions to be proposed at the Meetings.

The Independent 1Spatial Directors have therefore advised that each 1Spatial Shareholder should consider carefully the information set out below in making a decision as to whether to approve the Proposal. This is not intended to be an exhaustive list of relevant factors and 1Spatial Shareholders should consider their individual circumstances carefully before deciding whether to vote in favour of the Resolutions to be proposed at the Meetings.

Effects of Proposal

- The Proposal represents a discount of 10.6 per cent. to the Closing Price of 25 pence per 1Spatial Share on 6 October 2011, the last Business Day prior to this Announcement based on a Closing Price for Avisen Shares of 3.88 pence on 6 October 2011; and
- The Proposal represents a premium of 17.3 per cent. to the Closing Price of 25 pence per 1Spatial Share on 6 October 2011 based on the average Closing Price for Avisen Shares of 5.09 pence over the three month period ended on and including 6 October 2011.

Additional reasons for recommending the Proposal:

- Avisen has significant cash reserves which provide funds to accelerate investment in technology development in order to exploit the market position that 1Spatial has achieved;
- Avisen has an established blue chip client list in the commercial sector. Avisen's contracts with Tesco Direct and Unilever provide a solid foundation for the market introduction of location enabled analytics business models; and
- Avisen's Directors would bring significant experience into 1Spatial's strategic planning, in particular expertise in digital media, which would have significant benefit to the development of 1Spatial's new brand, Socium.

The 1Spatial Board believe that the merged entity would have a significantly enhanced market capitalisation and would provide a more interesting vehicle to attract investment. The size of the combined company would be more attractive to the banking sector and have more credibility when pursuing larger system integration opportunities in 1Spatial's core market. All of these factors will provide the Enlarged Group with a significant platform from which to grow.

6. Information on 1Spatial

Corporate History

1Spatial was originally called Laser-Scan and was formed in 1969 as an offshoot from the Cavendish Laboratory at Cambridge University initially developing laser-tracking devices and progressing, in 1975, to technologies that support mapping. In 1979 a contract with Ordnance Survey Great Britain (OSGB) was secured to build a national mapping database. Over the next 10 years, 1Spatial focussed on the digital mapping sector, securing sales around the world.

In 2000 Laser-Scan was purchased by the Yeoman Group plc, which was developing a new offering of in-car navigation services via mobile phone. Laser-Scan technology was used to build the advanced spatial database that supported accurate navigation routing. In 2001, new management were appointed and major investments were made in the development of components that extended Oracle's mainstream database technology, giving users the ability to enhance and maintain the quality of their spatial data.

In June 2003, the new management team established 1Spatial as a new company in order to complete a management buy-out of the goodwill and certain assets of Laser-Scan, which had been placed into administration. 1Spatial became an independent company focussed on automating the management of spatial data quality. The company won a number of key contracts with the RAF, a consortium of German states, Northern Ireland's Mapping Agency and Land Registry Ireland, which gave the company a solid recurring revenue base and re-established its reputation. A growth strategy followed, with 1Spatial making a number of successful acquisitions. These strategic acquisitions provided additional technology capability and additional revenue from solid installed bases that remain today. They were as follows:

- Sysdeco Kongsberg AS, Norway November 2004
- IME UK Limited, Stirling, Scotland June 2007
- Proteus Solutions Limited, Cork, Ireland July 2007
- Comsine Limited, Hampshire June 2008

Having established a sound commercial base, 1Spatial embarked on significant technology developments. 1Spatial's object-oriented data cache was integrated into a mainstream web-service architecture which provided a new approach to capturing knowledge through the use of an open rules language. This new approach to spatial data validation, enrichment and optimisation enabled 1Spatial to win a landmark contract with OSGB. This offering is marketed under the 1Spatial brand name Radius Studio.

The OSGB project success has had a significant impact on the profile of 1Spatial. Many other mapping agencies are interested in the architecture and technology. Code delivery sign off occurred at the end of 2010. At the same time 1Spatial was awarded a contract by OSGB to provide technology to support automated map production based on 1Spatial's map generalisation, or simplification, technology. Radius Studio is also being used by other National Mapping agencies such as, the Royal Airforce Charting Unit, Land Information New Zealand, Land and Property Services Northern Ireland, Ordnance Survey Ireland, Swedish Maritime Administration, IGN Belgium, German Lande and PSMA Australia.

Following the completion of the reverse acquisition of IQ Holdings in October 2010 and the subsequent listing on AIM, 1Spatial has begun the process of exploiting its platform through expansion internationally and domestically. Lagen Spatial Pty Limited was acquired in April 2011 to strengthen capacity in Asia Pacific and take advantage of the significant opportunity in Australia.

Current Trading and Prospects

1Spatial has just completed its eighth year of trading since the management buyout in 2003. It was a disappointing year financially, with revenues falling to £7.311 million for the year ended 30 June 2011. This was largely due to significant delays in signing large contracts and the cancellation of planned investments by other customers. The impact of these was to shift £1 million of expected revenue into the future. OSGB and OS Ireland have now been secured, which provides good revenues for visibility for the 2012 financial year. Profitability and asset value were also impacted by the reverse acquisition, with exceptional costs in excess of £2 million being accounted for in the last financial year. 1Spatial is now structured to focus on three clear markets, with different business models and significant prospects for growth and increased profitability:

- **Data Providers.** The solution delivered to OSGB for data management and automated generalisation, is being marketed under the brand name Imperium. This is targeted at the National topographic mapping and cadastral agencies.
- **GIS Market.** The success of 1Spatial's rules engine and approach to spatial data integrity and processing has captured the attention of the major players in the GIS Sector. This is a £1.5 billion annual market. 1Spatial's focus is to continue to strengthen its strategic relationships with leading companies in that sector by developing components that integrate its rules engine and geo-

processing technology into solutions provided by key companies, who represent over half of the total annual market with a combined customer base of 100,000s.

- **SoftwareasaService.** The scalable, web services architecture of Radius Studio has enabled 1Spatial to launch a new company, offering spatial data quality improvement under a Software as a Service Business Model. This will give access to 1Spatial's sophisticated technology via a simple, 4 button web based application. This will open up its technology to a market of nearly 200,000 potential customers.

The 1Spatial Directors believe that by securing access to the cash reserves of Avisen through the merger and enabling 1Spatial's technology to be productised at an accelerated rate, 1Spatial will be in a better position to realise these potential prospects.

7. Information on Avisen

Avisen is a management consultancy and software business that provides companies with advice and solutions in order to enhance overall company profitability. It has two trading businesses:

- Avisen – Management consultancy specialising in profit improvement and exclusive distributor of Acorn Systems' Software in the UK and Ireland.
- Storage Fusion Ltd – Independent Software Vendor specialising in storage analytics for the heterogeneous storage estate delivered using Software as a Service (SaaS) architecture.

Avisen

Overview

Avisen, the Group's management consultancy business, focuses on providing global companies with advice in relation to improving overall company profitability. One of the key tools that Avisen uses during this process is a software technology known as Acorn Systems. Based on a costing methodology designed by Harvard Professor, Prof Dr Robert Kaplan and Steve Anderson who is on the Board of the Company, Acorn uses transaction level cost allocation to reveal profit improvement opportunities across the enterprise's customers, products, segments, vendors, channels and processes. This enables clients to make fact-based, profit-focused decisions which Avisen then help them implement. Although niche, the Avisen brand is uniquely positioned as it has the exclusive UK distribution rights for Acorn Systems' products and global distribution rights outside of the USA and a skilled team of Technical and Business Consultants.

Avisen has built over the last year a platform to sell its Acorn Systems solutions by providing pilots to various Blue Chip customers including Tesco Direct and Unilever. This has proved the product offering and provided a platform to sell Avisen's services and resell the Acorn software across the market.

Avisen's target market and competitors

Avisen's target market is quite well defined. A typical client is a company with revenues in excess of £100 million and with high-volumes of transactions where they understand the total cost of running the business but can't see how each product, customer or channel is driving up that cost. These are sectors such as fast moving consumer goods, distribution, retail, financial services, professional services and pharmaceuticals.

Avisen's competitors are distributors of other profitability management software (SAP, Oracle, Prodocapo, SAAS Institute etc). Avisen's focus is on building recurring revenue from software sales and support contracts. This enables Avisen to work with and provide paid services to the "Big 4" consulting companies and other niche consultancy businesses providing profitability improvement services using Acorn. Avisen markets directly to these businesses and to the finance and operational executives of its target clients.

The Group continually assesses the demand for its products and services in the market place and adapts its product offerings and pricing strategies to support this. It has focused the business on helping the large corporate market understand the true cost and profitability of their customers, products and

operations as well as providing support in reconfiguring them. Avisen sees the most interest for the use of its software and services in:

- Logistics and distribution, to understand the network cost of delivered and returned goods and reconfigure supply chain based on the detailed analysis that Avisen provides.
- In FMCG and retail, to move past gross margin and understand the actual delivered margin from products and services through the supply chain in order to see true customer profitability.
- In financial services, to understand the profitability of individual customers, segments and products by allocating all costs and revenues to that grouping.
- In shared services and outsourcing, to build transparent “charge-back” mechanisms to allocate cost to the business units that consume them.
- In healthcare, to track the cost of patients through a hospital or other care setting and the actual costs associated with different procedures.

Storage Fusion

Overview

Storage Fusion is the author of SRA which provides comprehensive analytics for enterprise storage environments through an affordable SaaS service and without the need for disruptive probes and agents.

SRA cuts through the complexity of heterogeneous storage environments without the necessity for expensive on-premise software, on-going support and maintenance, a time-consuming implementation project, disruptive future upgrades and additional hardware to run the solution. This delivers detailed analytics within a matter of hours.

Storage Fusion empowers companies with the analytics they need to make informed decisions about their storage resources, thereby reducing IT expenditure and improving business operations.

With complete transparency an entire storage environment, Storage Fusion’s SRA solution enables an organisation to undertake the following business critical activities to deliver operational effectiveness:

- Storage reclaim
- Internal charge-back
- Data centre migration/consolidation
- Vendor rationalisation
- Technology swaps/refreshes
- Asset tracking
- Capacity planning
- Depreciation reporting
- Cloud migration
- Virtualization and thin provisioning analysis
- Storage tiering
- Metrics analysis and report trending
- Identification of configuration exceptions

Demand for the SRA product has been clearly demonstrated with the signing of contracts with a large International bank in September 2010 and a subsequent sale to a worldwide information technology company.

Storage Fusion's target market and competitors

Storage Fusion's target market is any organisation that needs to report across their storage estate. Typically these are global companies that have multiple data centres, hardware from more than one storage vendor and in excess of 100 Terabytes of storage.

SRA is also used as a presales assessment tool by hardware vendors and partners to augment their hardware and professional services revenue.

In September 2010 Gartner's report, the Magic Quadrant for Storage Resource Management and SAN Management Software, Storage Fusion was noted as a new vendor within the segment.

Strategy and objectives of the business

Avisen's business strategy is to continue growth, both organically and by acquisition, and to convert this growth into higher profit and cash flow for distribution to shareholders.

Avisen has a record of successful acquisition and disposals. The most recent disposal was of Inca, a reseller of IBM Cognos software, in April 2011 for £7.3 million (including a £1.3 million deferred payment) and the extinguishment of £1.2 million of debt.

The management team undertook a full business review following the disposal of Inca and developed the following key objectives for the year ahead:

- Improve organic growth in the Avisen business by:
 - Utilising its skilled workforce to deliver on key contracts.
 - Planned campaigns to increase awareness within key target sectors. Using Avisen's success with existing customers to demonstrate its abilities.
 - Re-defining key corporate messages within its target market.
 - Leveraging further the success of the Acorn solution globally and optimising partner marketing activities.
 - Build on the "Big 4" accounting firm relationships as a new channel to market.
- Improve organic growth in the Storage Fusion Business by:
 - Launching SRA Enterprise Edition.
 - Developing global sales network via partners.
 - Implement marketing strategy to increase product awareness, brand and sales revenue.
 - Developing additional SRA apps to enable new features that increase overall product value and sales.
 - Re-defining corporate messages and identifying key sectors to approach.
 - Developing awareness amongst the analyst community through key contacts at Gartner.
- Identify key acquisition targets which complement the current existing businesses.

8. Strategy of the Enlarged Group

The Directors of the Enlarged Group intend to create shareholder value both through further acquisitions and organic growth. Directors of the Enlarged Group will be focused on acquiring additional businesses that either extend the customer base of Avisen and ISpatial's current offering or provide complementary services and support that can be delivered to the current client base or sold through its sales channels.

The Enlarged Group's strategy will be to:

- accelerate the investment in ISpatial's Imperium, GIS Market Strategic Relationships and Avisen's new brand, Socium;

- utilise the cash resources of Avisen in order to accelerate the growth of the Enlarged Group, both organically and by further acquisitions in the business and technology sectors;
- extend the location supply chain capability, to offer location enabled decision making to the Business Intelligence market; and
- optimise the Storage Fusion Business as part of Avisen's existing performance management services.

9. Directors, management, employees and location of the Enlarged Group

The Enlarged Group will be led by a team comprising Steve Berry as Non-Executive Chairman, Marcus Hanke as Chief Executive Officer, Nic Snape as Managing Director, Claire Milverton as Chief Financial Officer and Dr. Mike Sanderson as Director of Strategic Development. The non-executive directors will be Marcus Yeoman and Mark Battles.

Following the Scheme becoming effective, Jonathan Hill will step down from the Avisen Board and shall remain an employee. In addition, Mark Battles will resign as a non-executive chairman of Avisen and take on the role as a non-executive director of the Enlarged Group.

Peter Bullock and Duncan Guthrie will resign as directors of 1Spatial immediately following the Scheme becoming effective and remain employees of the Enlarged Group.

Pending any agreement to the contrary, and subject to the approval of Avisen's remuneration committee, the current terms of service of Nic Snape, Dr. Mike Sanderson and Steve Berry will continue to apply.

Avisen recognises the achievements of the management and employees of 1Spatial, and intends that 1Spatial will continue to develop and grow as part of the Enlarged Group. The Enlarged Group will be led by a board drawn from the existing boards of Avisen and 1Spatial.

Avisen intends to safeguard fully the existing employment rights of employees of both the 1Spatial Group and the Avisen Group.

11. Conditions

The Conditions to the Proposal are set out in full in Appendix I. In summary, the implementation of the Scheme is conditional, *inter alia*, upon:

- the approvals of the 1Spatial Shareholders and Scheme Shareholders;
- the sanction and confirmation of the Court;
- the Scheme becoming effective by no later than 29 February 2012 or such later date as 1Spatial and Avisen may agree with (where applicable) the consent of the Panel and the approval of the Court, failing which the Scheme will lapse;
- approval by the Avisen Shareholders of the Avisen Resolutions at the Avisen General Meeting. Approval of such resolutions is required in order to implement the Scheme and their approval shall authorise an increase of the authorised share capital of Avisen, the allotment of New Avisen Shares to 1Spatial Shareholders, a sub-division of the existing share capital of Avisen and the amendment of the articles of association of Avisen; and

The Scheme and the Proposal are subject to the satisfaction (or, where applicable, waiver) of the Conditions set out in Appendix I. In addition, the implementation of the Scheme will require approval by a special resolution of 1Spatial Shareholders to be proposed at the General Meeting. In order to become effective, the Scheme must be approved by Scheme Shareholders at the Court Meeting (at which voting will be conducted by way of a poll). The approval required at the Court Meeting is a majority in number of those Scheme Shareholders present and voting, whether in person or by proxy, representing not less than 75 per cent. in value of the Scheme Shares held by such Scheme Shareholders.

“Public Data Transparency”	“Public Data” is the objective, factual, non-personal data on which public services run and are assessed, and on which policy decisions are based, or which is collected or generated in the course of public service delivery. The movement is supported by Sir Tim Berners-Lee and is a world-wide phenomenon. The UK, through data.gov.uk has published principles around the transparency (use, re-use, availability, timeliness, sharing and maintenance) of Public Data. The Public Sector Transparency Board, established by the UK Prime Minister, will drive forward the Government’s transparency agenda, making it a core part of all government business and ensuring that all departments meet the deadlines set for releasing key public datasets. In addition, it is responsible for setting open data standards across the whole public sector, listening to what the public wants and then driving through the opening up of the most needed data sets;
“Radius Studio”	<p>is an enterprise software solution developed and sold by 1Spatial. It enables organisations to rapidly transform and validate collections of location-based data into information that can speed up daily operations, reduce costs, meet compliance initiatives and aid decision making. By automating these traditionally time consuming and expensive tasks, significant time savings can be made and return on investment can be realised.</p> <p>By taking a powerful rules-based approach, Radius Studio enables organisations to be more agile as business and market needs change.</p>

	The solution is based on an open standards platform and compatible with a range of workflow applications, databases and geographical information systems (GIS). It is also available as an open architecture version for maximum enterprise interoperability;
“Software-as-a-Service (SaaS)”	Software-as-a-Service (SaaS) also known as Software on Demand is a software distribution model in which applications are hosted by a vendor or service provider and made available to customers over a network, typically the Internet. A provider licenses an application to customers as a service on demand, through a subscription, in a “pay-as-you-go” model, or increasingly at no charge;
“Spatial Data Infrastructure”	a spatial data infrastructure (SDI) is a framework of spatial data, metadata, users and tools that are interactively connected in order to use spatial data in an efficient and flexible way;
“SRM”	Storage Resource Management Software, used to manage and monitor large datasets on a variety of storage systems. Storage management is essential to ensure prevention of data loss, decrease of error rates of data replication, and decrease of the analysis time by ensuring that analysis tasks have the storage space to run to completion;
“Storage Area Network” or “SAN”	a network whose primary purpose is the transfer of data between computer systems and storage elements and among storage elements. A SAN consists of a communication infrastructure, which provides physical connections, and management layer, which organises the connections, storage elements and computer systems so that the data transfer is secure and robust;
“Storage Resource Analysis Software” or “SRA”	Storage Fusion’s Storage Resource Analysis (SRA) software automates the processes associated with storage analytics;
“Value-based Management”	this is a management approach that is designed to ensure companies are run consistently on value, i.e. typically to maximise shareholder value. Value-based Management comprises three key concepts – ‘Creating Value’ (ways to actually increase or generate maximum future value), ‘Managing for Value’ (governance, change management, organisational culture, communication, leadership) and ‘Measuring Value’.
